A Before placing your order, it's a good idea to view and decide on the following details options: Free Hems and Grummets.

HEMS

Heme consist of one inch of the Curion Banner material folded over to the backside of the banner and headed together to form a clean and strong one-such her We recommend having home on all banner to increase the strongth and durability of the hear. "We offer hee heme on all our banners. Hemmed edges are typically used to readerce the side of varyor banners." This height to manisch the banner's shape and prevent directions.

Provide a consension method for hanging or attaching visyl sign at regular points. This distributes the weight and helps to keep the virpl signs from sugging. Henzi Hemmed edges are hydrically used to reinforce the sides of virgl hansers, helping makes the hanser's shape and provent stretching. This is particularly helpful when grommets are use on virpl signs.

Four Potonts above for right poles of division to be under the edges of the hazner. This allows for a more even distribution of the hazner's weight to prevent sugging. Opposing pole pockets can also be used to make the hazners more rigid.

WIND SLITS.

Hypus choose this option, we will cut small half-circles into you banner to reduce wind resistance. This feature is perfect for outdoor hanners, as it helps to provest building and flapping in the wind.
