Free Banners and Comments.

10'x4'

Items on a custom vinyl banner refer to the finished edges of the banner that have been folded over and sewn to create a reinforced edge. This adds stability and strength to the banner and also provides a clean, finished look. The most common types of seams are double-fold hems and pole pockets. Double fold hems are created by folding the edge of the banner over twice and sewing it in place to create a clean, finished hem. Pole pockets, on the other hand, are created by sewing a pocket along the edge of the banner that is used to insert a pole or other support structure.

Comments are small metal rings that are typically inserted into the corners or along the edges of a custom vinyl banner, which provide a secure way to hang the banner. Comments are typically made of brass, aluminum, or other durable material, and are placed at strategic intervals along the banner. They are typically used to hang the banner from a cable, cable ties, or bungee cords to secure the banner in a wall, fence, or other structure. The presence of a small hole, usually reinforced with a metal ring, which allows for the banner to be hung up with a rope or cable tie and prevents the tearing of the material. Comments are a common feature on banners that will be hung in high-traffic areas or exposed to harsh weather conditions, as they are durable and resistant to tearing.

POLE POCKETS

Pole pockets are a feature on custom vinyl banners that are designed to make it easy to hang the banner using a pole. They are essentially a fold-over and sewn edge of the banner, which creates a pocket where a pole can be inserted. This allows the banner to be hung from a pole or a rope, and provides a secure way to display the banner. Pole pockets are typically placed at the top and bottom of a banner and can be created in different ways to fit different diameter poles. Pole pockets are a convenient way to hang a banner, as it eliminates the need for additional hardware or rigging to display the banner.

WIND FLAPS

Wind flaps, also known as wind flaps, are small tabs or openings in a vinyl banner that are designed to reduce wind resistance and prevent the banner from tearing or getting damaged in windy conditions. When the wind blows against a banner, it can create a large amount of force on the banner. Wind flaps are designed to break the wind, reducing the amount of force exerted on the banner and making it more resistant to tearing. They are usually placed at the corners or along the top of a banner and are a common feature on banners that are hung in high wind areas or exposed to harsh weather conditions.

Options and Features:

- Upload your multi-page file or design your own Custom Banners using our online design tool.
- Heat-sealed seams for increased durability and improved appearance.
- Graphics in all four corners and every two feet along the top and bottom for efficient hanging.
- Hems available for hanging banners.
- Same-day shipping is available for an extra rush fee.

Custom Banner Sizes

Custom banners in a variety of sizes starting from 2'x2', customizable up to 120' in length and 10' in width for horizontal banners, or 150' in height and 10' in width for vertical banners.

Production Time and Shipping

All banners are printed and shipped within 48 hours. We offer same-day print and ship for an additional fee. Clients enjoy low ground shipping for total purchases exceeding \$150.00. Select from UPS and FedEx shipping options, including ground, 2-day or 1-day transit, or overnight shipping.

Durability and Lifespan

The lifespan of your banner depends on usage, storage, and care. Banners typically last between 3-5 years, with some lasting up to 10 years. Outdoor use, weather conditions, and sunlight exposure can impact longevity. For added durability, consider 18-ounce vinyl with UV-resistant properties and reinforced corners for additional support.

Maintenance Tips:

- Roll banners for storage to prevent creasing.
- Avoid folding banners, especially if they are large.
- Apply light heat to remove creases during use.
- For outdoor use, choose 18-ounce vinyl and consider reinforced corners.
