Before placing your order, it's a good idea to view and decide on the following detailed options: **Free Hems and Grommets.**

CUSTOM VINYL BANNERS FINISH OPTIONS

Before placing your order, it's a good idea to view and decide on the following detailed options.

Free Hems and Grommets.

HEMS

Hems on a custom vinyl banner refer to the finished edges of the banner that have been folded over and sewn to create a reinforced edge. This adds stability and strength to the banner and also provides a clean, finished look. The most common types of hems are double-fold hems and rolled hems. Double-fold hems are created by folding the edge of the banner over twice and sewing it in place to create a thick, finished edge. Pole pockets, on the other hand, are created by sewing a pocket along the edge of the banner that is used to insert a pole or other support structure.

GROMMETS

Grommets are small metal rings typically inserted into the corners or along the edges of a custom vinyl banner, providing a secure way to hang the banner. Grommets are typically made of brass, aluminum, or other durable materials and are placed regularly along the banner. They are typically used in conjunction with rope, cable ties, or bungee cords to secure the banner to a wall, fence, or other structure. The grommet itself is a circular, hollow piece with a metal ring, which allows for the banner to be hung up with a rope or cable to suit prevents the tearing of the material. Grommets are a common feature on banners that will be hung in high-traffic areas or exposed to harsh weather conditions, as they are durable and resistant to tearing.

POLE POCKETS

Pole pockets are a feature on custom vinyl banners that are designed to make it easy to hang the banner using a pole. They are essentially a folded-over and sewn edge of the banner, which creates a pocket where a pole can be inserted. This allows the banner to be hung from a pole or a rope, and it provides a secure way to display the banner. Pole pockets are typically placed at the top and bottom of a banner and can be created in different sizes to fit different diameter poles. Pole pockets are a convenient way to hang a banner, as it eliminates the need for additional hardware or rigging to display the banner.

WIND SLITS

Wind slits, also known as wind flaps, are small cuts or openings in a vinyl banner that are designed to reduce wind resistance and prevent the banner from billowing or flapping excessively in the wind. When a banner is hung outdoors, the wind can exert a lot of pressure on the surface of the banner, causing it to stretch, tear, or even break. Wind slits allow the wind to pass through the banner, reducing the amount of force exerted on the banner and making it more resistant to damage. They are usually placed at the corners or along the edges of a banner and are a common feature on banners that will be hung in high-wind areas or exposed to harsh weather conditions.
