Tear Resistant Banners Durability and Life

The life of a banner really depends on how it is being used, stored, and taken care of. The more it is handled, folded, and rolled, the faster it will deteriorate. Typically, a banner will last between 1-6 years. The most they can serve you is 5-10 years or the least 1-2 years. Naturally, if the banner is being used outdoors 24/7, due to the weather conditions and the sunlight, it will wear out much faster than if it is used indoors. Proper care of the banner, like folding and storing the banner and store it, but the maintenance really determines its lifespan. If you are planning to mount your banner outdoors, you are better off getting an extra durable 18-ounce vinyl, and even then, you should expect to replace it every couple of years. Also, keep in mind that the wind will blow against it. You can consider ordering reinforced corners along with your banner if you are planning to order grommets to keep your banner, as the reinforced corners will ensure that the grommets will not rip out of the banner. Finally, if you want your banner to last for the later use, we recommend that you roll it and keep it away from dust and extreme heat, as opposed to folding it. When the banner is rolled as opposed to folded, you are preventing the vinyl from developing cracks. Also, when you are storing it, be sure to keep it in a place that it don't sleeve out too much, you can always get rid of the creases when hanging or laying the banner flat, and by applying light heat to the banner, but not too close to it. If you have any questions regarding the life of your banner, or how to extend the banner and ensure a longer lifespan, don't hesitate to contact us. We will be happy to assist you!

We carry a variety of advertising options, including perforated vinyl for window clings as well as Opaque Window Signs.

CUSTOM MESH BANNERS

Custom Mesh Banners are made of PVC mesh with 10% of the banner surface being small holes. These holes in the material allow the air and the wind to flow through the banner, without compromising the quality of the printed image. Mesh Banners are ideal for windy areas. Mesh Mesh is supposed to be a bit larger than fabric banners, but they are not quite as strong as regular vinyl banners. Also, being that the surface of the banner consists of microscopic holes, making the banner semi-transparent, the color vibrancy of the design is not going to be too strong. Another thing to consider is that mesh doesn't perform too well in the cold. Extreme cold can cause the PVC to crack.
